

Zoner Studio Improves Everyday Photo Editing with Enhanced AI Tools in This Fall's Update

21 October 2025, Brno, Czechia—With its Fall Update, the popular Czech photo editing and management software introduces features that accelerate photo selection, streamline editing, and simplify export. Users will greatly value the faster workflow, simpler selection of their best photos, and the ability to enlarge images without losing quality.

“At Zoner Studio, we’re taking the path of gradual evolution, bringing real value with each step. This update once again helps users work with their photos faster and easier,” says Jan Kupčík, Product Manager at Zoner Studio.

AI Close-ups: Select your best shot in seconds

The most notable new feature is the enhanced AI Close-ups. Previously, it only detected faces. Now, it can automatically detect entire figures, animals, vehicles, and airplanes. This allows users to immediately focus on the most important parts of a photo and easily compare multiple shots without manually zooming in. **This dramatically speeds up the selection process when sorting through dozens of portraits or action photos.**

The feature works entirely offline, with local calculations and results displayed in seconds.

AI Resize: Enlarge photos without losing quality

The Zoner Studio Fall Update expands your creative possibilities—you can now **enlarge photos** without compromising their quality. Whether you’re preparing a photography exhibition, printing an album, or want to keep the original dimensions of a cropped photo, AI Resize gives you freedom without compromise.

Efficiency without excess

Zoner Studio remains the **easiest way** to start editing photos for photographers who want high-quality, realistic results without unnecessary effects. The Fall Update brings more than just two new tools. There are numerous improvements across the entire interface to make everyday editing faster and more intuitive: easier selection, quicker edits, and streamlined export. Zoner Studio continues to be simple, fast, and affordable—whether you’re working with family portraits, wildlife, or event photography.

About ZONER Inc.

ZONER Inc. is a Czech technology company specializing in photo management and editing software. Its flagship product, Zoner Studio, has long been among the leading photo editing software, as recognized by the EISA Photo Software 2025–2026 Award.
